

POST-SURGERY CARE

Personalised care to optimise your recovery, in the comfort of your home!

- Recovery from surgery does not end when a patient is discharged from the hospital. A good home care plan can optimise recovery, help you regain independence, improve quality of life, and reduce complications.
- Our post-surgery care experts work with your doctor to tailor-make a personalised care plan that meets all your needs, so you can be confident that you or your loved one can recover from surgery safely and successfully.

POST-SURGERY CARE

Nursing Care and Monitoring

Holistic post-surgery care planning
Active monitoring and reporting on health vitals
Wound care, pain management, injections
Coordination between doctor and care team

Personal Care

24/7, day, or night shifts to aide health, hygiene and safety at home, mobility, meal prep, or light housekeeping

Physiotherapy

Therapeutic procedures to regain mobility, flexibility, strength, and function. Especially for orthopaedic surgeries, early mobilisation leads to an earlier return to normal function.

Pre or Post Surgery Psychological Support

Enhance mental health with counselling before surgery to ease anxieties, while post-surgery support can help with many emotions that arise after a major surgery or traumatic event

Speech and Language Therapy

Exercises that help with speech, articulation, or swallowing

Nutritionist and Meal Catering Services

Nutrition awareness, meal planning, weight-loss or weight-gain support, or simply have healthy meals delivered to your door

Discount Partners

Medical equipment and consumables, pharmacy delivery, and home lab tests
